SUMMARY

Software engineer working at the intersection of QA/SDET and Full Stack development — Web, API, and Mobile (React, Node.js, React Native). I bridge the gap between building scalable interfaces and APIs and architecting automated test coverage (Cypress, Appium, Maestro, Jest, RestAssured). Proven track record shipping reliable software with Shift-Left Testing, CI/CD (GitHub Actions), and relational databases.

SKILLS

TESTING & AUTOMATION

Cypress Appium Maestro Selenium
Jest RNTL Postman RestAssured

FRONT-END & MOBILE

React React Native Next.js TypeScript
JavaScript Tailwind CSS

BACK-END & LANGUAGES

Node.js Java Spring Boot PHP C#

DATABASES

PostgreSQL MySQL SQL Oracle

CLOUD & DEVOPS

GitHub Actions CI/CD AWS Azure Git

LANGUAGES

English Upper-Intermediate (B2)

EXPERIENCE

QA SDET & Full Stack Developer (Web, API & Mobile)

Current (Remote)

Mundo Invest

- Full-stack development of web apps, RESTful APIs, and mobile interfaces using React, React Native, and Node.js.
- Designed and implemented E2E automated test coverage across Web, API, and Mobile with Cypress, Appium, and Maestro.
- Build and maintain unit and integration tests for services and components using Jest and React Native Testing Library (RNTL).
- Integrate services with PostgreSQL and MySQL databases, including data modeling and validation.
- Drive Shift-Left Testing, code review, and CI/CD pipelines (GitHub Actions) within Scrum/Kanban workflows.

QA SDET & Front-end Developer (Web & Mobile)

JUL 2022 — NOV 2024

Zumburguer House

- Built web and mobile interfaces with React for order management, a digital menu, and operational workflows.
- Implemented automated tests and a full QA pipeline (SDET), keeping order and inventory operations stable and reliable.
- Integrated front-end with APIs and third-party services, with focus on responsiveness and user experience (UX).
- Automated core operational processes and drove continuous improvements to customer-facing workflows.

Junior Technical Support Analyst

FEB 2019 — MAR 2020

TotalTech Technical Support

- Preventive and corrective hardware maintenance for corporate desktops and laptops.
- Operating system installation, network configuration, and direct end-user support.
